

Mentor Meeting 12/02

Progress:

We've implemented the following additional features:

- sharing sheets with collaborators
- real-time collaboration
- authentication of sheets so user can only access sheets they created and sheets shared with them
- user can specify playback measure
- user can specify tempo
- keys at the top of the screen can be clicked to hear their notes
- users can delete sheets (if the user is a collaborator, this removes them from the list of collaborators)

We've also

- removed unnecessary files
- added documentation
- cleaned the UI
- made routes REST-ful
- creators can remove collaborators

Agenda:

Demo app

Go over plans for possible final additions

- add tests!
- users can edit sheet names
- adding a library of public sheets
- autocomplete when entering collaborator names

Questions

- additional features?
- mocha questions
